

SCS 3214 / IS 3113: GROUP PROJECT II – 2021

Group – 54 STARTUP DOOR

FEEDBACK ON INTERIM PRESENTATION

Our application Startup Door is a platform to establish a bridge between the Service provider and the service consumer. The Major concern is to provide the middle-class community with a passive income opportunity with social entrepreneurship-based discipline.

The Feedback was given by the proposal evaluation Panel

- Color Matching
- Language Translation in the Web Portal
- Adding functionalities in Client-Side

Our Plan of action is to accommodate the given feedback and change requests

- Able to discuss with the Supervisor and Co-supervisor.
- Implementing the FAQ section for the customer convenience
- Because our clients often engage with the Web portal, we chose a light color theme. People use our system too often, therefore we chose a light blue theme to encourage them and make them feel more at ease with the platform.

Added features for StartUp Door

1. FAQ Section added to ask important facts from the Service provider
2. Service providers' progress capturing using charts
 - Providing visualization paradigms for monthly revenue, no of jobs, and top reviews for each service provider
 - Highlighting top comments and accusations done by the customers.
3. Providing language translation option using google API
 - when a post or a comment is written in English, providing the feature to translate it into Sinhala or Tamil.
